

# Security Software

The Logos Imaging Application (LIA 8) is our latest proprietary software designed for usability with advanced touch screen operation. LIA 8 allows control and enhancement from any Windows-based touch enabled device to the X-ray system. With the development of touch enhancement tools built in, LIA 8 delivers quick and easy assessment anywhere.

## Security Software

LIA 8 lets users capture, edit, save and share digital X-ray images. The touch interface gives control and enhancement from any Windows-based touch enabled PC or tablet allowing operators to quickly and easily control the X-ray system from their device. LIA 8 was built around an incident management model, which stores images according to the user entered incident details. Users can search by incident name or date allowing quick access to previous incidents.

Ease of use and touch screen operation were the primary objectives in the designing of LIA 8. With only the relevant tools and options presented in each window, operators can focus on the specific task at hand. This uncluttered focus is clearly displayed in the image viewing window, where the image evaluation is presented full screen. These features are invaluable for tablets and devices with smaller displays.

When used with Logos Imaging DR systems and ISTÓS web viewer, LIA 8 offers the same user-friendly UI in a web interface accessible through any web enabled device. Multiple users can now access images under review from their smart phone or tablet, regardless of whether they are using Android, iOS, or Windows.

XTK Plug-in allows users to operate Logos DR kits from XTK™ Software.

## Features

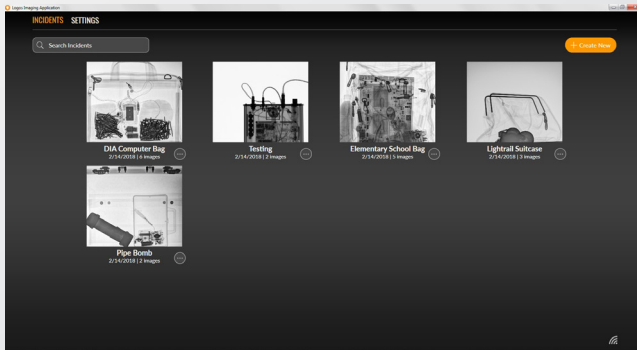

- *Single Click Image Processing*
- *Web Interface for Tablet or Smart Phone Viewing*
- *Touch Screen Control and Enhancement*
- *US-Based Design and Support Teams*

## Features

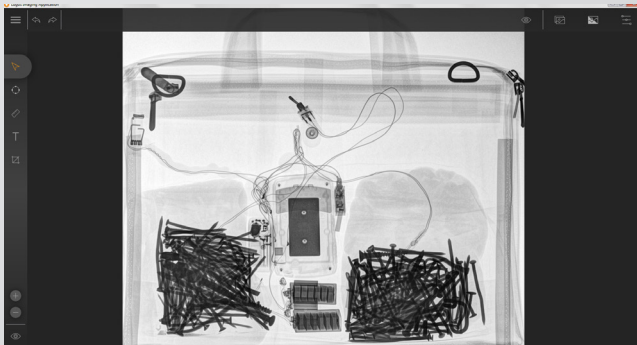

### SECURITY SOFTWARE

Adjustments	Auto Correct, Auto Level
Database Management	Create Backup, Restore from Backup
Filters	ORATÓS, Adaptive Histogram, Colorize, Despeckle, Emboss, Equalize, Invert, Sharpen, Smooth, Outline
Image Details	Created Date, Image Processing History
Image Levels	Histogram, Expanded View, Auto Level
Image Rotation	90 CW, 90 CCW, 180, Flip Horizontal, Flip Vertical, Free Rotation
Image Viewing	Pan Control, Zoom Control, Pinch Zoom
Tools	Image Stitching, Select, Line, Polyline, Rectangle, Region of Interest, Polygon Region of Interest, Ellipse, Text, Measurements, Image Calibration
Multiple Language Support	We currently offer multiple languages and can add new languages upon request. Please note that new languages take approximately 4 - 6 weeks to implement.
